BH Steel Tanks, Security, Strength and Service

BH Tank specializes in welded tanks in storage capacities ranging from 1,000 to 100,000 gallons. In addition to our standard water storage tanks, we have in-house capabilities to take your design concepts from prototype to production and installation.

- Potable Water Storage
- Recycled Water
- De-Salination Plants
- Industrial Process & Cooling
- Waste-Water Processing
- Ammonia Diffusion
- Fire Protection
- NFPA-22 Installations

BH Tank’s services include initial consultation, engineer submittal, tank fabrication, coating systems, accessories (such as sparger tubes, level controls and gauges, ladders, platforms, anchoring devices, inspection and maintenance manways), foundation design and installation, tank padding, tank delivery and installation.
